AIR STARPD

Trusted, Open Local Controller for Rotary Screw/ Reciprocating Compressors

Why you should demand AirStarPD™

When you demand energy efficiency and machine safety, demand AirStarPDTM. For proven reliability, flexibility, and functionality, AirStarPDTM is the trusted aftermarket local controller to manage one Rotary Screw or Reciprocating compressor.

AirStarPDTM is built on the Allen Bradley Micro 850 PLC platform to Nema and NEC standards, with all components housed in a Nema 12 enclosure, and offering eight standard analog inputs, fourteen digital inputs, plus ten digital outputs. No proprietary hardware is provided.

For peace of mind, the HMI serves as the operator interface for all machine control functions, all set-point entry and modification, as well as all system monitoring and event history.

AirStarPD™ is your solutions-source. The data table is configured to 3PX standards, providing easy access from the 3PX-Backbone™ data concentrator for master control (sequencing) solutions, and SCADA or remote monitor routing.

AirStarPD™ Features & Benefits

- Elaborate HMI Functionality allows complete configuration, tuning, troubleshooting, and operation of the compressor.
- Familiar Allen-Bradley Modular PLC Platform is easily supported—no proprietary parts are used.
- **Support**, whether on-site, by phone, or via modem connection, support is prompt, effective, and available 24/7.
- **Documentation** thoroughly addresses set-up, tuning, troubleshooting, and operations.
- Ethernet Communications are native and Modbus is optional for connection to any third party DCS, MIS, or SCADA systems.

- Special Retrokits Available: Atlas Elektronikon, IR Intellisys, IR Xe, Hitachi, SullAir Supervisor, and many other Retrokits include additional instruments and transmitters for complete installation. In some instances, the PLC requires a new enclosure due to space limitations in the existing enclosure.
- Variable Speed Drive control is optional for Rotary Screw Compressors.
- Compatible with 3PX-Backbone™, which permits electronic integration with numerous third party controllers.

AIR STARPD

Allen-Bradley PLC-Based Open Local Controller

HARDWARE SPECIFICATIONS

Enclosure

Rating	Nema 4/12
Dimensions	24h x 24w x 12d
Color	Light Gray
Weight	115 lbs.

PLC Components

Processor	A-B Micro 850
Analog Inputs	Eight
Digital Inputs	Fourteen
Digital Outputs	Ten

Front Panel Devices

HMI	7" PanelView Plus 800 (Touch)
	StopPush Button
Control Po	werSelector Switch

Communications

Ethernet	Port Used for Connection to HMI
Serial Port	Used for Connection to Modem
	or Optional Modbus
Modbus	Connection Optional

Power Requirements 120 VAC, 10 amps

BASE SYSTEM

- The base system is defined as having eight analog inputs, fourteen digital inputs, and ten digital outputs which are dry contacts.
- Additional variables for display, alarming, machine trip, and start-permissive can be added and configured in the field.
- When requested, the analog inputs can be increased to eighteen.
- Instruments are not included as part of the controller and may be provided separately, or existing instruments may be reused.

* Pictured are numerous options not included with the base system.

OPTIONS

Enclosure System

- Nema 4X SS Enclosure Rating
- Purgeable Instrument Access Door for HMI
- Vortec Panel Cooler
- Panel Air Conditioning
- Panel Heater
- Larger Display

PLC Components

- Analog Inputs Up to Eighteen
- Analog Outputs Up to Four

Control Scheme

- Variable Speed Drive - Optional

480V Power Package

- Oil Heater Contactor
- Blower Motor Starter
- Control Circuit Transformer
- Lockable Disconnect
- Main Motor Starter

Communications

- Modbus RTU
- Ethernet Switch (Option) Connection to DCS
